

The T-Max Winch has been engineered for the toughest Australian Outback. The T-Max Winch Specialist Range is now much larger and more comprehensive and covers models from 2000LB up to 18500LB models.

The Winch Range includes our : OFF ROAD , OUTBACK, PERFORMANCE, ATV, ATV PRO and INDUSTRIAL Models.

Every winch is pre-tested in the factory for line pull strength. The Series Wound Motor ensures constant high power and torque when you need it. Roller Bearings instead of bushes, transfers power more efficiently to the winch.

Machined Steel Gears assure the greatest power is available for the job to be done. Now featuring our 4th Generation Integrated Solenoid Module (ISM) in every model which is manufactured for military and industrial use around the world. This new ISM unit is fully sealed and waterproof. Silver layer on the solenoid contactor surface results in a much lower surface temperature during operation, and allows a much longer life span.

Many T-Max winches are available as either a 12v or 24v unit. Each winch has heavier line pull capacity and optional Wire Cable or Synthetic Rope. The rugged gear box is a 3 Stage Planetary Gear Train and sliding ring gear clutch.

The Wireless Controller has been fully updated and suits all brands of series wound motor winches. It includes the 4th Generation Integrated Solenoid Module (ISM) and has a dual control of a 30 metre wireless range and a 3.6 metre line cable option.

T-Max Australia has a dedicated focus on after sale parts and service with a 5 year mechanical warranty and a 2 year electrical warranty, both which are testimony to our motto that a happy customer is the best advertising for T-Max and its stockists alike.
